What is the situation regarding Mesurol and Maize?

2020 sees a big change to maize seed dressings due to the withdrawal of Mesurol on maize seed in the UK. Mesurol (active substance: methiocarb) deters feeding damage by corvids/rooks, pigeons and other birds. It also helps control frit fly and improves establishment, ensuring the optimum number of plants per hectare.

-
- Only limited varieties will be available with Mesurol so orders must be placed early.
Speak to Spunhill about the alternative seed treatments are available for maize in 2020

Maximising forage production for the coming season

- Rejuvenate?
- Options for poor grass leys not worth saving?:
 - ⇒ Full grass reseed
 - ⇒ Forage crop for Summer grazing followed by an autumn reseed.
 - ⇒ Forage crop for grazing over Winter followed by a Spring reseed

Spunhill in conjunction with Brownlow Vets are hosting a joint information evening on 31st March at Spunhill Ellesmere Depot 7pm

Please contact us to register for this event.
